LR-CS-82

HYDRAULIC LONG REACH CIRCULAR SAW

Reliable's LR-Series long reach saws are intended for safely trimming trees from the ground or an aerial bucket. With an overall length of 82 inches, the operator may easily reach areas not possible with a standard chain saw. The offset head provides a flush cut, from a comfortable stance, reducing operator fatigue and strain.

The powerful hydraulic drive motor can easily cut branches up to 3.5 inches in a single pass. The quick stop trigger reduces blade coast time for increased safety. The dielectric property of the fiberglass extension tube will reduce the chance of electric shock.

FEATURES:

Insulated fiberglass extension tube - reduces risk of electrical shock when used near an energized line.

Quick Stop System - reduces blade coast time.

Trigger Guard - prevents accidental blade activation.

Quick Set Spool - Locked in the Open-Center position at factory.

9" Blade - Allows a 3.5 inch cutting depth.

Rubber Collar Hand Stop.

SPECIFICATIONS:

Weight: 9.3 lbs. **Length:** 82 inches

Flow Range: 5-8 gpm

Blade Speed: 4,800 RPM @ 6 gpm

Operating Pressure: 1,000-2,000 psi

Pressure & Return Port Thread: # 6 SAE & # 8 SAE

Blade Diameter: 9 inches

Blade Thickness: .1/16 inch

Arbor: 0.635" x 0.878 inch

Blade Operating RPM: 5,400 (minimum)
