## REL-200DA

### 200 TON HYDRAULIC COMPRESSION TOOL

#### SPECIFICATIONS:

Output:	200 ton
Weight:	190 lbs.
Dimensions:	14" W x 17" H
Ram Stroke:	1.57" Travel
Oil Capacity:	1134cc

3/8 Inch  
High Pressure  
Screw-Type  
Coupler Set

## REL-200DA

### 200 TON COMPRESSION TOOL

The **REL-200DA** double acting hydraulic compression tool has been designed for full tension, transmission and substation connections.

This tool accepts 200 ton shell type dies. The **REL-200DA** may be operated from a vehicle PTO assisted by an REL-10-1 intensifier and PVA 0022 double acting control valve, or any 10,000 psi double acting hydraulic power supply with adequate oil capacity.

The removable die cap allows for fast, easy positioning of the connector.

The double acting design will advance the ram until appropriate pressure has been achieved. Upon completion of the crimp, hydraulic flow can be reversed to retract the ram, virtually eliminating die hang-up.
