

REL-6TN-M

MANUAL HYDRAULIC
6.6 TON CRIMPING TOOL

REL-6TN-M - 6.6 Ton Service Entrance Crimper Accepts Kearney type and "W" type 6 ton dies

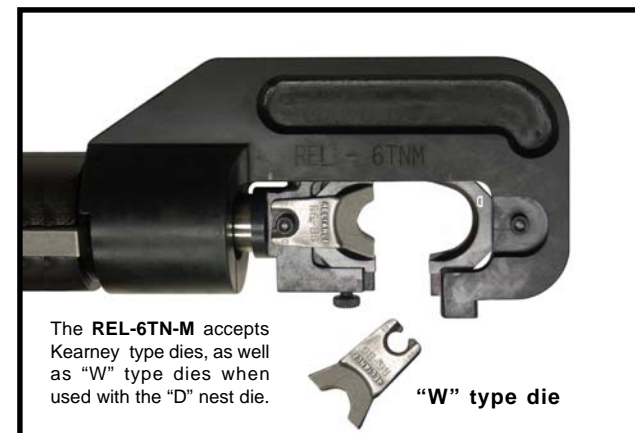

This versatile manual compression tool will make service entrance connections up to 4/0 quick and easy.

The features a .95 inch jaw opening providing ample space for easy die positioning. A two-stage advance piston. The first stage brings the crimp to the connector quickly, while the second stage provides the power to make the connection. The 180° swivel head permits simple tool positioning and usability in confined areas. The pressure release lever allows the jaw to retract quickly, and a magnetic oil reservoir plug traps metal contaminants. **Wt: 8.25 lb., Length: 16.8 in.**

OPTIONAL: R6-28K "W" style cutter die allows cutting of # 4-4/0 ACSR, Aluminum, & Copper.

CONNECTOR RANGE:

LUGS	#6-500 MCM Copper
SPLICES	#6-500 MCM Aluminum
H-TAPS	4/0 - 4/0

The REL-6TN-M accepts Kearney type dies, as well as "W" type dies when used with the "D" nest die.

"W" type die
