

## RELIABLE REPAIR AND TESTING SERVICES

We at Reliable Equipment pride ourselves on the quality and variety of services available from our location in Ivyland, PA. We would like to take this opportunity to inform our new customers of our testing and repair capabilities, as well as to remind you of our 30 year history as a service provider to the Power Utility Industry.

We began as **Delan Tool** and established a strong reputation as a reliable equipment and service company. We liked it so much we adopted it as our name.

Each of our technicians have been Factory Certified by a variety of major manufacturers (i.e., Faimont, Huskie, etc.), and are able to fix any tool within the Power Utility Industry.

High and low pressure hydraulic tools, air tools, electric tools, hoists, safety equipment, and hand tools all require regular testing and maintenance to insure safety, reduce costly downtime, and prevent costly major repairs.

Upon receipt of a tool we will perform recertification testing to verify that OEM standards are met. In the event of failure, refurbishment would be required.

Repair estimates are provided quickly, free of charge. Upon approval, the repairs will be expedited, taking advantage of our extensive stock of manufacturer specified replacement parts. The tool will then be repainted and retested before being returned to the customer.

The following pages contain only a portion of the tools and equipment available from your Reliable Equipment representative. These descriptions are intended to assist our customers in selecting the best tools for their required task. These are NOT intended as instructions for use. To insure operator safety, please read all instruction manuals and warnings prior to using any of these tools. **WE CARE!**
