

UNDERGROUND DISTRIBUTION GROUNDING SETS

TRANSFORMER GROUNDING SETS

Each set includes an orange-jacketed elbow for the voltage-class indicated below, 6 feet of 1/0 copper grounding cable with clear jacket, and bronze grounding clamp T600-0466.

Fault current rating for each set: 10,000 amps for 10 cycles

Part No.	Description	Wt.
C600-0729	15 kV Single-0 Transformer Grd. Set	4 lb.
T600-2131	25 kV Single-0 Transformer Grd. Set	6 lb.
C600-1927	35 kV Single-0 Transformer Grd. Set	8 lb.

Optional Storage Bag # T600-0865.

Pre-assembled for Single-Phase or Three-Phase Padmounted Transformers

GROUNDING PARKING STAND

This set provides a grounded surface for the jacketed elbow after it is removed from the transformer bushing and tested to determine if it is de-energized. Set includes bronze ground clamp and 4 ft. of 1/0 yellow ground cable.

Fault current rating for each set: 10,000 amps for 10 cycles

Part No.	Application	Wt.
T600-0730	15 kV	7 lb.
T600-2124	25 kV	8 lb.

Optional Storage Bag # T600-0865.

Pre-assembled for Padmounted Transformers

TEMPORARY GROUNDING SET

Each of these sets consists of a three-way terminal block assembly, three 6-ft. lengths of 2/0 copper ground cable with clear jacket, a ground clamp, and three orange elbows.

Fault current rating for each set: 10,000 amps for 10 cycles

Part No.	Application	Wt.
C600-0759	15 kV	14.5 lb.
T600-2132	25 kV	15 lb.

Optional Storage bag # T600-0865.

Pre-assembled for 3-Phase Switches and Transformers

TEMPORARY GROUNDING SETS

C-Clamp or Ball-Stud Set includes a three-way copper terminal block, four bronze ground clamps and three 6' lengths of 2/0 copper clear-jacket ground cable with threaded-stud copper ferrules. C-clamps are T600-0466. Ball-studs and clamps are C600-2102 and C600-2100.

**Fault current ratings: 37,000 amps for 15 cycles
26,000 amps for 30 cycles**

Part No.	Description	Wt.
C600-0758	C-Clamp Live-Front Grd. Set	15 lb.

Optional Storage bag # T600-0865.

Pre-assembled for Live-Front Switches and Transformers
