

REL-262L

REL-262R

Reliable Model # REL-262L and # REL-262R Gas Drills

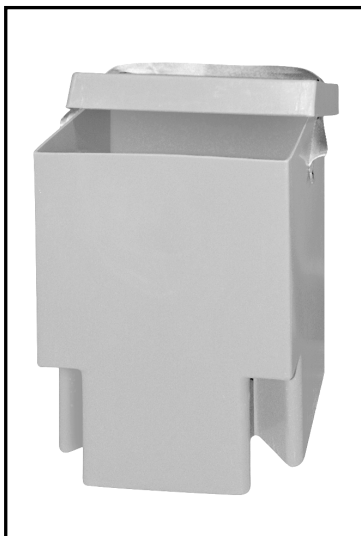

Reliable Equipment is now offering two models of gasoline powered drills to meet all of your portable drilling needs.

The REL-262L and the REL-262R feature a high torque 26cc engine that delivers 1.3 H.P. for greater drilling capacity. A Walbro diaphragm carburetor and convenient handle design enable these drills to be used comfortably in any position. A 20:1 high torque gear reduction ratio combined with a balanced lightweight design (providing the ultimate in portability) makes both of these drills ideal for power, telephone, and cable crews.

The REL-262L features a unique "Gear Locking" mechanism that locks the gear case, allowing the entire unit to be rotated in the event that the bit becomes bound during use.

The REL-262R offers a fully reversible gear case for more demanding applications. This feature can be engaged with the simple push of a lever to extract bits instantly.

Model	Weight	Gear Case	RPM	Chuck	Fuel Cap.	Clutch
REL-262L	10.9 lbs.	Locking	3500	1/2 in.	16.2 fl. oz.	Centrifugal
REL-262R	12 lbs.	Reversing
