1708 - 200' /1709 - 300'

## ROLATAPE<sup>®</sup> WHEEL MEASURING SYSTEMS

### 400 Series:

The Rolatape 400 Series is the closest you can come to an all-purpose measuring wheel. For more than 45 years, the 400 has been a proven choice for engineers, contractors, surveyors and other professionals with demanding measuring needs. Because of its 4-foot circumference, it can be used with accuracy on rough terrain. The 400's highly accurate counter provides precision measurements up to 100,000 feet (nearly 19 miles) or 100,000 meters (more than 60 miles) without resetting. Its calibrated wheel provides precise measurement. And, with its Safety Glo color, it's safer in high traffic situations. Yet the 400 folds into a compact 17-inch unit, so it's portable and easy to take to sites. Built-in stand keeps wheel in upright position.

**Optional carrying case available.**

### 415 Series:

Through the toughest underbrush and surface conditions, Rolatape's heavy duty 415 Series can go the distance. With its precision and durability, the 415 is a standby for professionals from engineering to agriculture. The 415 features a coated steel disc wheel and a precision counter capable of measuring 100,000 feet (nearly 19 miles) or 100,000 meters (more than 60 miles) without resetting. Its calibrated wheel provides precise measurement. Plus, increments along the disc circumference provide measurements down to 1 inch or 1 centimeter. An added safety feature is the 415's Safety Glo coating. Built-in stand keeps wheel in upright position.

**Optional carrying case available.**
