REC-P500 ROBO* PUMP™

Battery Powered Light Duty Pump 10,000 PSI

No external power source to hook up so the operator can get right to work. The push button remote control has a 10 ft. cord and operates the advance, hold, and retract modes.

The REC-P500 has a rapid advance two-stage pump system and an audible/visual bypass when 10,000 psi is reached. This is a must for linemen to determine if the proper tool tonnage has been applied to the connector. A patented drop-out bypass cartridge allows external pressure adjustment from 4,000 to 10,000 psi and complete replacement in minutes.

For your convenience, most existing cutting or compression heads can be attached to the 3/8" female coupler on the pump.

We recommend the pump be used on tools up to 15 tons. Larger tools up to 30 cu/in. can be used, but will have longer advance and retract times. Hose can also be added between the pump and head for extra length. For best results we recommend our 6' non-conductive hose. Longer hoses can be used, but the crimping time will increase proportionally.

Kit Includes:

- 1 Battery Powered Tool
- 1 Carrying Strap
- 1 Carrying Case
- 2 BP-70R Batteries
- 1 CH-3TR 15 Min. AC Charger

Specifications:

- Weight:** 17.5 lbs. w/ Battery
- Size:** 16" x 10" x 6.5"
- Flow:** 30 cu/in at 300 psi
9 cu/in at 10,000 psi
- Fluid Reservoir Capacity:** 30 cu/in

MODEL BPS

Replaceable Bypass Cartridge

Huskie hydraulic compression tools feature an exclusive bypass system that no other manufacturer can offer. The patented BPS replaceable bypass cartridge allows the operator to externally calibrate the tool output tonnage.

We recommend the use of our PG-series pressure gauges when testing output tonnage, using only a hex wrench to adjust optimal pressure.

Designed to save money and downtime on field repairs, the BPS cartridge is good for 10-12,000 cycles before replacement. It is easily replaced in a

few minutes without dismantling the tool. The user can determine and adjust tonnage or replace the factory preset cartridge without having to send the tool back to the manufacturer, or Huskie will recalibrate/test your cartridge at no charge.

Note: Please consult Reliable for the specific bypass cartridge for your tool.
