

# REL-3000H

## MANUALLY LEVER OPERATED ROLLER CHAIN HOIST

This 1-1/2 ton hoist from **RELIABLE** promise to provide years of service, under the rigorous conditions demanded by the Power Utility & Construction Industry.

The durable, malleable iron external frame and lever assemblies house internal components constructed and tested to provide smooth and safe operation.

### FEATURES:

The lever action can be reversed by releasing the safety pin and rotating handle for inverted applications.

Safety hooks rotate 360° and feature spring latches to simplify a secure connection at the support and the load.

Thumb latch releases chain for easy connection.

Slack may be quickly removed by pulling on the free end of the chain.

Redundant safety measures prevent handle rotation or chain release under load if the operator were to lose control.

The **REL-3000H** utilizes a multiple chain configuration to offer a 1-1/2 ton capacity.

The chain lug hook may be detached to provide a longer lift capacity and faster operation in 3/4 ton applications.

Consult your **RELIABLE** representative for additional information about factory authorized testing, repair and recertification services.

Manufactured to meet or exceed **ASME B30.21**.
