

RELIABLE EQUIPMENT & SERVICE CO., INC.

REPAIR & TESTING SERVICES

We at Reliable Equipment pride ourselves on the quality and variety of services available from our location in Warminster, PA. We would like to take this opportunity to inform our new customers of our testing and repair capabilities, as well as to remind you of our 45 year history as a service provider to the Power Utility, D.O.T. and Construction Industries

Each of our technicians have been Factory Certified by a variety of major manufacturers, and are able to fix virtually any tool within the Power Utility Industry.

High and low pressure hydraulic tools, air tools, electric tools, hoists, safety equipment, and hand tools all require regular testing and maintenance to insure operator safety, reduce costly downtime, and prevent major repairs.

Upon receipt of a tool we will perform a thorough inspection, and testing to verify that OEM standards are met.

Repair estimates are provided quickly, and free of charge. Upon approval, the repairs will be expedited, taking advantage of our extensive stock of manufacturer specified replacement parts. Finally the tool will then be repainted and retested before being returned to the customer.

For additional information related to a specific tool type, please contact your local Reliable representative, or contact the Repair Department direct at 800-966-3530.
